

SPECIAL SOLUTIONS ENGINEERED FOR KOBELCO EXCAVATORS

Our reliable and efficient excavators are built for versatility. Whether it's infrastructure, irrigation, tunneling, mining, demolition, or material handling—Kobelco offers a wide range of customized **attachments to meet every need.**

Amphibious

Suitable Models

SK140, SK220, SK380

Application

Works in swamps, rivers, wetlands, flood & canal projects

Advantages

- Superior flotation on marshy terrain
- Reliable stability in waterlogged conditions

Clamshell Bucket

Suitable Models

SK220XDLC

Application

Metro shafts, ports, dredging, bulk material loading/unloading

Advantages

- Heavy-duty build for durability
- Precise handling with low spillage

Electromagnet

Suitable Models

SK220XDLC, SK380XDLC

Application

Scrap handling, Demolition debris, Rail Clean-up

Advantages

- Energy-efficient, eco-friendly
- Enhances safety by reducing manual handling

Powerlatch Coupler

Suitable Models

SK140, SK220, SK380

Application

Quick Switching of Buckets, Breakers & other Attachments

Advantages

- One-lever hydraulic locking
- Lightweight yet strong, reducing wear

Long Reach

Suitable Models

SK380, SK520, SK850

Application

Dredging, deep foundations, reservoirs, dams & ports

Advantages

- Reinforced for stability and durability
- Smooth, controlled long-distance operation

Front Shovel

Suitable Models

SK380XDLC, SK520XDLC, SK850LC

Application

Excavation in tunnels, canals, trenches, road & rail projects

Advantages

- Rugged structure for demanding jobs
- Forward-digging design for confined areas

Primary Crusher

Suitable Models

SK220XDLC, SK380XDLC

Application

Demolition of concrete & reinforced structures

Advantages

- 360° rotation for maximum flexibility
- Twin-cylinder wedge arm for strong crushing

Pulveriser

Suitable Models

SK380XDLC

Application

Demolition of reinforced concrete & steel structures

Advantages

- High crushing force with twin cylinders
- Compact, low-noise design for urban use

Rock Breaker

Suitable Models

SK140, SK220, SK380

Application

Quarrying, Mining, Demolition

Advantages

- High-impact energy with reduced recoil
- Long service life with low maintenance

Telescopic Dipper

Suitable Models

SK220XDLC, SK380XDLC

Application

Metro shafts, sewer & manhole excavation, deep foundations

Advantages

- Precision and safe vertical digging
- Sliding cabin & rotating clamshell

Vibro Boom

Suitable Models

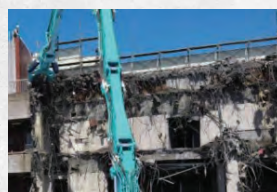

SK380XDLC

Application

Piling for marine works, bridges, walls & foundations

Advantages

- Flexible gooseneck for angled placement
- Effective in confined job sites

Demolition Attachment

Suitable Models

SK380XDLC, SK520XDLC

Application

High-rise buildings, bridges, industrial dismantling

Advantages

- Long-reach boom for safe dismantling
- Enhanced stability for controlled demolition
